

Generate Matchreports on chess-results.com

Last update 22.8.2024, Author Heinz Herzog

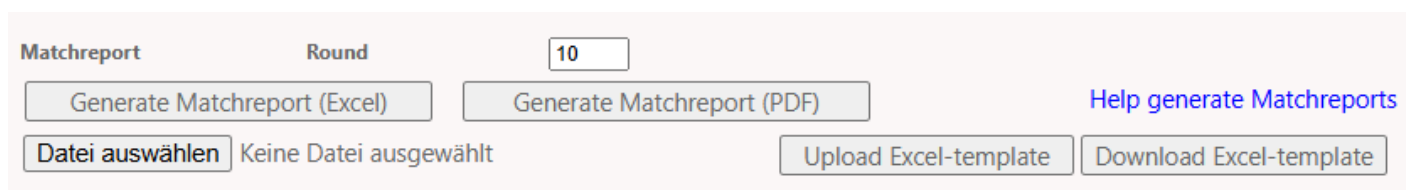

With Swiss-Manager menu „Internet / Customize lists on chess-results.com“ you open a dialog that allows the organizer to customize the lists and generate Table-Cards, Pairing-Cards and Matchreports as Excel or PDF-File.

The Matchreports are only available for Team-tournaments!

How to do:

1) In Swiss-Manager: Click Menu „Internet / Customize lists on chess-results.com“

The following form is displayed (scroll below):

The screenshot shows a web interface for generating matchreports. It features a header with 'Matchreport' and 'Round' labels, and a text input field containing the number '10'. Below this are two buttons: 'Generate Matchreport (Excel)' and 'Generate Matchreport (PDF)'. To the right of these buttons is a blue link labeled 'Help generate Matchreports'. At the bottom, there is a file selection area with a button 'Datei auswählen' and the text 'Keine Datei ausgewählt'. To the right of this are two more buttons: 'Upload Excel-template' and 'Download Excel-template'.

With „**Help generate Matchreports**“ this pdf-file is displayed.

2) If you have no template then select one of the examples:

- Example Matchreport A4

[Download Excel-template](#) [The generated Matchreport as PDF file](#)

- Example Matchreport A3

[Download Excel-template](#) [The generated Matchreport as PDF file](#)

3) Download the appropriate template and adapt it.

4) Click „Datei auswählen“ (=Select File, should be displayed in your language)

5) Upload Excel-template

6) Click „Generate Matchreport (PDF or Excel)“
